

An Integrated System of People, Parts and Service.

Comprehensive Technical Support.

Contact your representative for comprehensive technical support documentation, including 3-Part Specifications, Testing Data and Material Safety Data Sheets. Technical staff is available to answer specific questions and help you adapt our panel system to special requirements. For help in estimating, ask your representative about our Auto-Estimator CD.

A Rock Solid Warranty.

All FinishStone™ components and styles come with a 20-year limited warranty. See www.FinishStone.com for details.

Step Up to the Look of Stone.

FinishStone™ can enhance the appeal and value of your next pre-engineered metal building. Contact your representative.

FinishStone™ panels are made from a technology licensed from Polyrock Technologies.

Note: Colors shown are mechanically reproduced. They may vary from the actual product. Please refer to actual product sample for true color representation.

Building Codes/ Fire Safety Information
Check your local, state and federal ordinances for code requirements on exterior and interior applications.

It's A Natural For Pre-Engineered Metal Buildings.

**The Upscale Look of Stone...
With The Ease of Traditional Cladding.**

Pre-engineered metal buildings (PEMBs) have earned a reputation for quality, even among high profile buyers like churches, municipalities, professional businesses and retailers. Now, thanks to the FinishStone™ Engineered Faux Stone Panel System, you can enhance the perceived value of your PEMB with the upscale look of crafted stone — without adding excessive weight, time or cost.

In fact, the added elegance of the FinishStone™ look just might make a PEMB solution possible in areas where municipal codes have been a problem in the past.

Here's why.

FinishStone™ panels deliver the prestige of crafted stone masonry without adding the kind of weight that requires structural reinforcement. Unlike traditional masonry, FinishStone™ panels mount with the ease and versatility of other premium PEMB cladding materials. Because our panels can be quickly field-cut and installed without specialized tools, you can use existing metal building installation teams. And because the colors are provided by natural iron oxide pigments, they will provide the lasting look of real stone.

Before

THE FINISHSTONE™ ECOLOGY

An Integrated System of People, Parts
and Services.

FINISHSTONE™

More than a building material, the FinishStone™ brand is a system of styles, materials and services that makes it easy to upgrade the look and value of your pre-engineered metal building.

Easily Mastered Modular Installation.

Built on a familiar, easy-to-understand system of panels, corners and ledgers, the FinishStone™ installation method is quickly mastered by existing metal building installation teams. Our numbered panel system and variable width corner kits make it easy to create a crafted masonry look.

THE FINISHSTONE™ ECOLOGY

An Integrated System of People, Parts
and Services.

A Professionally Developed Training Program.

Developed especially for installation teams, this simple, easy to understand *and easy to present* program has detailed, step-by-step instructions. Each and every step is documented with a clear illustration. Typically, installers come up to speed quickly — *in a period of time measured by hours, not days.*

A Growing Selection of Nature-inspired Stone Profiles and Colors.

We're developing a growing array of natural stone masonry looks and colors. Our guiding principles: what's the latest in architectural design, and what's emerging to create future demand?

Built-in Moisture Management.

It's a simple, no-hassle design. Raised, horizontal ridges on the back of the panels allow natural flow and evaporation of moisture.
