Check your local, state, and federal ordinances for code requirements on exterior and interior applications.

It's a Natural for Enhancing Value.

**The Upscale Look of Stone...
With The Ease of Traditional Cladding.**

We recognize that today's home and business owners are hungry for more choices, for new ways to make their structures stand out with distinction. Now, thanks to the FinishStone™ Engineered Stone Panel System, any building exterior can have the popular, upscale look of crafted stone — without adding excessive weight, time or cost to the project. In fact, whether used as an accent, a grand entrance or the entire structure, FinishStone™ panels enhance curb appeal by giving you the upscale look of real stone.

FinishStone™ combines beauty, resilience and value

FinishStone™ commands an upscale look—yet the panels install like traditional cladding, with no need for structural reinforcement. An installation crew can quickly field-cut and mount FinishStone™ panels without specialized tools, and panels are easy to repair, so additional contractors will never be necessary. The durable FinishStone™ panels are waterproof, mold resistant and highly impact resistant, due to their closed-cell polyurethane formulation. And because the natural colors are provided by rugged iron oxide pigments, the authentic stone beauty will last, too. A FinishStone™ project will add to the character of your home or building, at a savings over real or manufactured stone. Contact your dealer today to redefine your home or business with the natural beauty of FinishStone™.

THE FINISHSTONE™ ECOLOGY

An Integrated System of People, Parts
and Services.

More than a building material, the FinishStone™ brand is an engineered system of styles, materials and services that make remodeling and construction projects easy and efficient.

Easily Mastered Modular Installation.

Built on a familiar, easy-to-understand system of panels, corners and ledgers, the FinishStone™ installation method is quickly mastered by existing crews. Our numbered panel system and variable width corner kits make it easy to create a crafted masonry look. The easy-to-repair panels make maintaining the upscale look of a FinishStone™ project simple, as well. More than a building material, the FinishStone™ brand is a system of styles, materials and services that makes remodeling and construction projects easy and efficient. For more information on how to install or repair FinishStone™ panels, please contact technical support.

THE FINISHSTONE™ ECOLOGY

An Integrated System of People, Parts
and Services.

A Professionally Developed Training Program.

Developed especially for installation teams, this simple, easy to understand *and easy to present* program has detailed, step-by-step instructions. Each and every step is documented with a clear illustration. Typically, installers come up to speed quickly — *in a period of time measured by hours, not days.*

A Growing Selection of Nature-inspired Stone Profiles and Colors.

We're developing a growing array of natural stone masonry looks and colors. Our guiding principles: what's the latest in architectural design, what's emerging to create future demand?

Built-in Moisture Management.

It's a simple, no-hassle design. Raised, horizontal ridges on the back of the panels allow natural flow and evaporation of moisture.
